

3-D Pop-Up Greeting Cards

General Notes:

The card was cut 8" x 12"

For the interfacing I either used very heavy weight fusible Vilene on both fabrics and then fused those together using the double sided web OR I used the double sided fusible Fast2Fuse heavyweight

The 3-D Pop-Up Quilted Greeting Card was in the Quilting Arts magazine edition Dec 2013/Jan 2014, issue 66

This article/project was made by Mary McCauley who does some amazing 3-D work. You can see more by visiting
