

Seam Finish: Joining a Seam with an Overlock Substitute Stitch

Many machines, in particular the electronic machines have this stitch or you may select another similar stitch and use the same method.

This is an ideal stitch with either woven or knit fabrics.

For our sample we used this stitch:

Method:

- Using either Foot A or Foot F stitch a seam with a 1.5cm (5/8") seam allowance
- Trim the excess fabric back to the stitching line without clipping the stitching
